

TASMIM SHAJAHAN

Full Stack Developer

Dhaka, Bangladesh

📞 01777682337 ✉ rocketom24@gmail.com 🌐 github.com/rocketom24

Professional Summary

Full Stack Developer experienced in designing, developing, and deploying production-ready SaaS applications and full-stack web solutions. Proficient in Next.js, React, TypeScript, Tailwind CSS, Node.js, Prisma, PostgreSQL, Supabase, REST APIs, authentication, database design, and responsive UI development with experience delivering software for real-world clients.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Kotlin, SQL

Frontend: Next.js, React.js, Tailwind CSS, HTML5, CSS3, Responsive UI

Backend: Node.js, Express.js, REST APIs, Server Actions, Server Components

Databases: PostgreSQL, MongoDB, Firebase Firestore, Supabase, Prisma ORM

Auth & Payments: Clerk, Supabase Auth, Firebase Auth, RBAC, Session Management, Stripe Checkout, Webhooks

Deployment & Tools: Vercel, Git, GitHub, Docker, Postman, VS Code, Android Studio

Engineering: Full-Stack Development, API Integration, Database Design, Performance Optimization, Debugging, Secure Coding

Projects

Restaurant Operating System | *Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Supabase, Stripe* 2026

- Built a production-ready Restaurant Operating System for a real sushi restaurant client based in Milan, Italy, supporting dine-in, takeaway, delivery, reservations, and online ordering.
- Engineered end-to-end full-stack features using Next.js App Router, React, and TypeScript, owning implementation from database design and backend logic to responsive frontend interfaces and deployment.
- Architected normalized relational database schemas using PostgreSQL and Prisma ORM to manage menus, customers, orders, reservations, payments, tables, and business workflows.
- Implemented secure authentication, session management, and role-based authorization using Supabase Authentication with protected routes and access control.
- Developed REST APIs, CRUD operations, and server-side business logic powering menu management, reservations, payment processing, kitchen operations, and customer workflows.
- Integrated Stripe payment gateway with secure checkout, payment verification, webhook handling, and transaction workflows.
- Optimized application performance through query optimization, database indexing, lazy loading, code splitting, caching strategies, and Core Web Vitals improvements.
- Deployed the production application using Git-based development workflows while following clean architecture, secure coding practices, and maintainable software design.

EWU FairRide: Fairness-Aware Ride Sharing | *Java, Firebase, Google Maps API, Weather API* Research Project

- Developed a native Android ride-sharing application for university students, applying research on fairness perception to improve pricing transparency and trust.
- Implemented fairness-aware fare calculation using real-time distance, traffic, weather, and route data from external APIs to recommend equitable fares for riders and drivers.
- Built ride validation, real-time location tracking, and emergency location sharing, including fare acceptance requirements before trip initiation.
- Integrated Firebase for authentication, real-time data synchronization, and ride management while applying object-oriented and Android development principles.

Nour Ayni - Urdu Poetry Writing Platform | *Next.js, TypeScript, Clerk, Tailwind CSS, Cloudinary* Personal Project

- Built a personalized Urdu poetry writing platform focused on an immersive digital writing experience with traditional aesthetics and a responsive writing environment.
- Developed a feature-rich writing editor with rich text editing, reusable templates, custom typography, attachments, debounced auto-save, and responsive layouts.
- Implemented Clerk authentication and Cloudinary-based storage while developing PDF/PNG export functionality that preserves custom typography and visual styling.
- Created reusable React components and optimized the responsive user experience using Next.js, TypeScript, and Tailwind CSS with component-based architecture.

Gym Fitness Mobile Application | *Java, Android Studio, Firebase*

- Built a native Android fitness application focused on workout tracking and fitness management.
- Implemented user-friendly mobile interfaces, application logic, and Firebase integration following Android development best practices.
- Improved application usability and performance through optimized activity lifecycle management and responsive UI design.

Experience

Education Consultant & Marketing Manager

June 2025 – September 2025

EdSparkle Education Consultancy

Dhaka, Bangladesh

- Provided education consulting services while managing end-to-end client communication and documentation throughout the application process.
- Created digital marketing content and coordinated marketing campaigns across multiple platforms.
- Collaborated with team members to manage multiple client projects, ensuring timely communication and accurate documentation.
- Strengthened problem-solving, communication, project coordination, and stakeholder management skills in a fast-paced environment.

Education

East West University

Graduated: 2026

Bachelor of Science in Computer Science & Engineering

Dhaka, Bangladesh

CGPA: 3.48/4.00

Higher Secondary Certificate (HSC)

GPA: 5.00

Secondary School Certificate (SSC)

GPA: 5.00
